

Rule 1466 South Coast AQMD

The DustTrak™ Environmental Monitor is a real-time supplement to Federal Reference Method (FRM) data collection that can be deployed remotely quickly. Many DustTrak monitor configurations are available on the South Coast Air Quality Management District pre-approved list of instruments for Rule 1466. Choose one of these two popular configurations, or connect with your regional sales representative to review all available options for complying with Rule 1466.
