

MSP Turbo II™ Vaporizer

Model 2852PE-P

Low flow, piezo and pneumatic valves

MSP's Turbo II™ Vaporizer 2852PE-P is designed for high-precision microelectronic applications that require low to mid vapor flow rates. Based off of the field proven, highly reliable, and low-maintenance MSP Turbo™ Vaporizers, the new 2852PE-P provides stable vapor concentrations while maintaining a very small footprint. The 2852PE-P also features an on-board control valve and a liquid pneumatic shut off valve for extremely fast flow-rate response and reduced dead space.
