

COMMITTED TO A **BETTER WORLD**

TSI provides solutions to help protect people and environments.

Human Health

Protecting the health of our occupants and workers is paramount to any business.

- Occupational hazards such as exposure to dust, gases, heat, and noise
- Minimizing the transmission of diseases and infectious agents
- Long-term health impact of poor indoor environmental quality

Human Comfort

Whether you are managing an office space, educational facility, retail or entertainment facility, the occupants' comfort can impact their experiences and attitudes.

- Thermal comfort
- Lighting comfort
- Sound comfort
- Indoor air quality

Human Performance

People want to perform at their best. Some IEQ conditions may be impacting their performance – indoors and outdoors.

- Increased alertness and attention to quality
- Improved decision making
- Increased test scores
- Reduced absenteeism

Energy Efficiency

Energy efficiency is a goal for virtually all building owners and managers. Managing costs is a critical aspect, while balancing environmental quality for the occupants.

- Sustainability
- Cost savings
- Lower carbon footprint
- Lower greenhouse gas emissions

TSI Link™ Solutions

Measuring isn't enough. You need to gather, analyze and understand the data to make the best decisions.

- Automated and custom reporting
- Record keeping for compliance
- Guidance to help you solve your problems or educate your staff
- Data management tools to effectively store and retrieve information

TSI Services

Deciding on a solution is important. Ensuring that solution meets or exceeds your expectations is critical.

- Integration services
- Calibration services
- Maintenance and upgrades
