

® Knowledge Beyond Measure.

# Your Air Quality Data, Always Within Reach

Access remote monitoring and instant alerts for faster, smarter decisions with TSI Link™ Smart Bridge

Connect your DustTrak™ Monitors to TSI® cloud and gain full visibility — anywhere, anytime. TSI Link™ Smart Bridge transforms your DustTrak™ Aerosol Monitors into an advanced system for real-time air quality monitoring. The TSI Link™ Smart Bridge enables you to check dust levels, device status, and analytics from any location. Reduce field visits, save time, and respond faster to exposure risks.

## How it Works

### TSI Link™ Smart Bridge Connectivity

#### TSI Link™ Smart Bridge

A Windows application that runs on a user's device.

#### TSI Link™ Dashboard

This can then be used on any device to view telemetry in real-time.

# Why Choose TSI Link™ Smart Bridge?

- **Remote Monitoring**

Access live data from all your DustTrak™ instrument through a single, secure cloud platform

- **Instant Alerts**

Get SMS or email notifications when dust exceeds your thresholds

- **Data Storage**

Enjoy easier access and store dust exposure data in TSI® cloud

- **Actionable Insights**

Review historical data to identify trends and support compliance.

- **Automated Custom Reports**

Simplify data analysis and reporting for your team.
