

Reliable Measurement. Confident Results.

AeroTrak® + Remote Airborne Particle Counters

0.2-25.0 μm Particle Measurement

Reliable Measurement Driving Confident Results

TSI® AeroTrak®+ Remote Airborne Particle Counters (APCs) offer cleanroom professionals top-notch reliability and no-hassle operation. They are designed to cover a wide range of particle sizes to meet the needs of your manufacturing environment. Rapid setup and ease of operation make them top-choice for saving time during installation while ensuring reliable measurements over the life of your clean facility.

AeroTrak®+ Remote APCs are available in two configurations. The 7000 Series is a traditional remote APC used with an external vacuum system. For those applications where an external vacuum system is not available or where retrofitting a flexible clean facility is not feasible, the new 6000 Series remote APC with built-in pump is the ideal solution. Both offer critical advantages to increase your yield.

No more waiting for critical data with reliable second-by-second sampling

- Minimizes product risk/waste
- Reduces manufacturing costs
- Detects adverse trends to enable instant proactive response—before the end of the sample period
- Instantly alarms upon excursion

5 Year Laser
Warranty

7000 Series

6000 Series
*All models 0.1cfm

What's more...

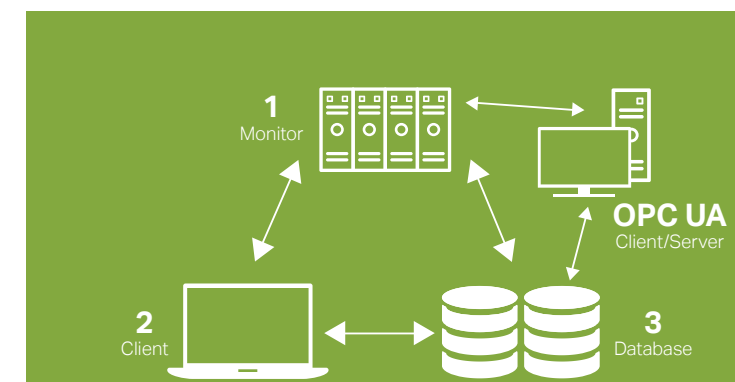

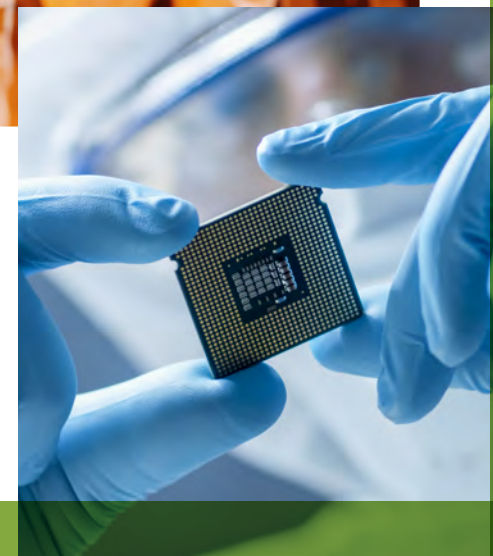

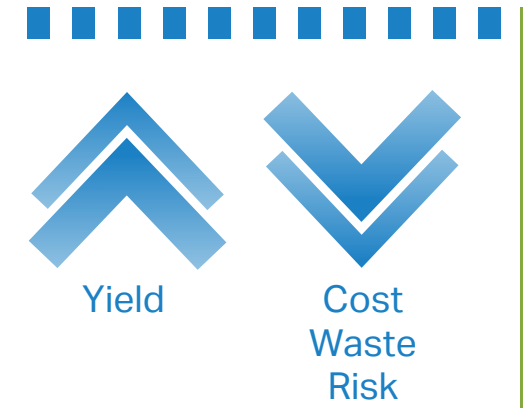

- Simple installation options with Power over Ethernet
- Wireless enabled to ease installation and flexible manufacturing
- Safe data storage if network should fail (250,000 data buffer size)
- Easy, rapid setup (all models) or relocation (6000 Series models) to save time and money

Improving Your Yield No Matter Your Application

TSI® AeroTrak®+ Remote APCs are now available for a wide range of critical applications. They work to maximize your yield by reducing cost and waste while also reducing risk and ensuring regulatory compliance.

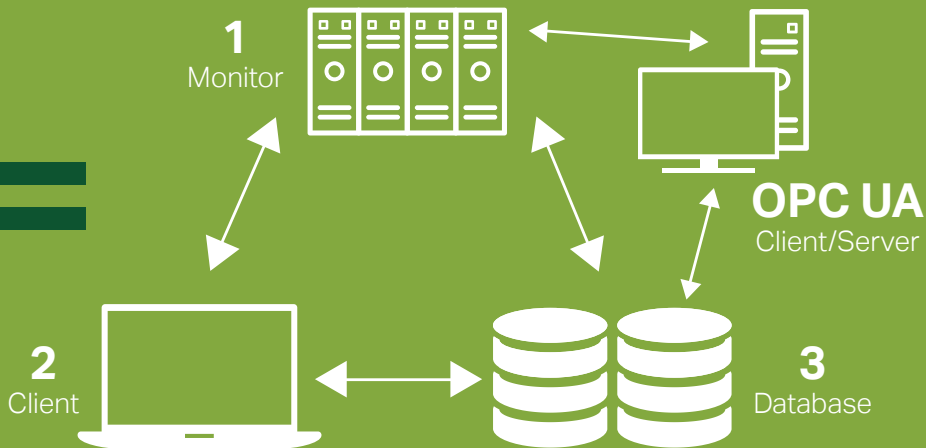

- Pharmaceutical
- Semiconductor
- Electronics
- Industrial

Use AeroTrak+ Remote APCs with TSI FMS Software, it's a system that can't be beat for no interruptions, no data loss and no-hassle compliance.

No Interruptions. No Data Loss. No-Hassle Compliance.
